Why Consult Dr. Soma from SJ Clinical Aesthetics?

Dr. Soma can recommend the best treatment plan tailored to your needs, ensuring the best possible results for smoother, healthier skin. Dr. Soma has 30 years of experience in plastic surgery.

Our Services :

Keloids

Keloids usually occur when the body produces too much collagen during the healing process of a wound. Normally, when the skin is injured, the body produces collagen to repair the tissue. However, in people prone to keloids, the body produces excess collagen, leading to an overgrowth of scar tissue.

Liposuction

Liposuction is a safe procedure if it is done by certified and experienced surgeon. It can help sculpt the body by removing unwanted fat from the body such as abdomen, thighs, hips, buttocks, calves, breasts, arms and the face.

Tummy Tuck

Tummy Tuck helps to enhance physical beauty by removing excess skin and fat from the abdomen. Patients can expect improvements in their figure, improved posture, some relief of back pain, and clearing of infection in skin folds of the overhanging abdominal apron.

Blepharoplasty

Blepharoplasty is a procedure to help correct drooping upper eyelids and alleviates the puffiness below the eyes. Opt for Blepharoplasty if you wish to remove excess skin folds and bulging fat bags in your upper and lower eyelids, and would like to have a double eyelid.

Face Lift

Face lift is a procedure used to counteract the effects of aging by tightening the tissue beneath the skin of the cheek, jaw, and neck. The results of a facelift will help you look younger with a more vital and cheerful facial appearance.

Rhinoplasty
